

PROTECT YOUR FILES AGAINST LOSS, THEFT, VIRUSES, AND NATURAL DISASTERS. SHARE BUSINESS DATA SECURELY AND PRIVATELY IN THE OFFICE OR ACROSS THE GLOBE. SYNC YOUR CRITICAL WORK ACROSS ALL YOUR COMPUTERS. ACCESS YOUR DATA FROM ANY WEB BROWSER. YOU CAN DO ALL OF THAT AND MORE, ON THE GO, FROM ANYWHERE, SECURELY, WITH JUST A CLICK.

Secure online backup, sync and file sharing for teams.

Offsite Backup is an invaluable tool for businesses. Computer failures, missing or stolen laptops, and corrupted files are facts of life and without a fail-safe backup, your business is exposed.

Offsite Backup users enjoy the peace of mind and flexibility that comes from knowing that their company's data is protected with our AES-256 encrypted automatic backup - for all their computers and employees.

Collaboration is also a necessity for today's businesses. Our file sharing and remote access features ensure uninterrupted productivity between employees both inside and outside the office. Our multi-way sync function means that files are constantly updated as work is done on them, keeping teams in sync as projects develop.

Folsom Tech Offsite Backup

Our offsite Backup supports multiple computers and multiple users, maximizing a team's ability to collaborate using the same files. It is perfect for organizations and teams of 2-100 people and also allow users to easily access and manage their data via the web.

Folsom Tech Offsite Backup - Server Edition

The Server Edition is designed for organizations looking for an easy, secure, efficient way to back up and protect their Windows or Linux servers. Users can manage their data via the web from any computer, anywhere in the world.
